Contents

8.1 Analysing the Relationship Between Friends and Followers for Twitter Users

8.1.1 Retrieve the posts from Twitter

relevant posts can be retrieved from twitter by leveraging the `rtweet` package. Unfourtunately *SquareEnix* is a compound word and so it will be necessary to return results to match `SquareEnix` or `Square Enix`, this can be acheived by specifying the regex `.*square*`:

The `rtweet` API will search for tweets that contain all the words of a query whether or not they are compounded together or seperated by *whitespace* characters [1].
